Re: Submittal for MTD Approval of the StormTree Biofiltration System

Dear Mr. Cooper:

StormTree is submitting the StormTree® biofiltration system for approval as a Manufactured Treatment Device (MTD) filter to meet the Virginia Stormwater Management Program. The documents I am submitting along with this letter include the MTD Registration form; Washington Ecology GULD approval letter; Technical Evaluation Report (TER) for the TAPE field study; 4X6 system analysis; Operation/Maintenance Plan.

StormTree appreciates your time and consideration in evaluating the StormTree system for approval.

Please contact me should you have any questions.

Sincerely,

Paul Iorio
Sr. Project Manager
StormTree
